SUMMARY:

- Embedded software engineer with experience working in a challenging fast paced environment. Strong performer and great team player who thrives in a technical role. Good at looking at issues with a broad view without losing focus of the finer details.

PROFESSIONAL EXPERIENCE:

GE Aviation

(2008 - Present)

- Feature expert for multiple programs
 - Planned feature development to fit within cost and budget constraints
 - Provided support to other teams to speed development and assist with integration
- Agile scrum team leader
- Ran formal tests for several software projects to prepare for certification
- Created libraries from common code to simplify code base and make updates easier
- Evaluated hardware and software for use on with program development and testing
- Designed condensed format for data requests to reduce bandwidth
- Created network routing rules allowing virtual test stations to be created reducing the load on deployed hardware

Technisource

(Summer 2007)

- Utilized Java and MySQL to develop a planning application

Hitachi Global Storage Technologies

(Summer 2006 - Winter 2006)

- Created log analysis scripts with Perl
- Automated the maintenance of test systems

EDUCATION:

Michigan Technological University

- Master of Science coursework in Electrical Engineering focusing on embedded real-time systems
- Bachelors of Science in Computer Science

SKILLS:

- Operating Systems: Linux, OpenBSD, Solaris, Windows XP, Windows 7
- Programming Languages: Java, PHP, HTML, CSS, Bash, C/C++, Python, Perl
- Change Control: Dimensions, Subversion, Mercurial
